1.0 PREAMBLE

1.1 Introduction

The Heritage-based Family and Religious Studies learning area focuses on the study of the respective historical backgrounds, beliefs and practices, practitioners, rites and rituals of selected religions in Zimbabwe and their impact on an individual, family, local, national and global communities respectively. The Heritage-based Family and Religious Studies (FRS) learning area is a four-year syllabus that provides learners with opportunities to harness cognitive, religious and moral experiences. These experiences help the learners understand, interpret and apply religious and moral concepts to their everyday life. It is a multi-faith approach to the study of religion, which makes learners to be aware of their respective religious identities in the context of Ubuntu/Unhu/Vumunhu, religious plurality, as well as both their horizontal and vertical relationships with their respective families, communities, nation, the global village and the natural environment.

1.2 Rationale

Family and Religious Studies facilitates the respect for human dignity and diversity. The learning area is significant in the development of Ubuntu/Unhu/Vumunhu, social responsibility and a sense of sound ethical norms from other religions.
