GEOGRAPHY
PAPER 2

4022/2

NOVEMBER 2021 SESSION

2 hours 30 minutes

Additional materials:
Answer paper

TIME 2 hours 30 minutes

INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number in the spaces provide on the answer paper/answer booklet.

Answer **four** questions. Answer **one** question from each of sections A, B, C and one other question from any section.

Write your answers on the separate answer paper provided. If you use more than one sheet of paper, fasten the sheets together.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part question. Sketch maps and diagrams should be drawn whenever they serve to illustrate an answer.

This question paper consists of 14 printed pages and 2 blank pages.

Section A (Physical Geography)

Answer at least **one** question from this section

- 1 (a) (i) Describe the difference between intrusive and extrusive volcanic landforms. [4]
- (ii) Name any **three** extrusive volcanic landforms. [3]
- (b) Study Fig. 1.1 showing volcanic landforms and answer questions which follow.

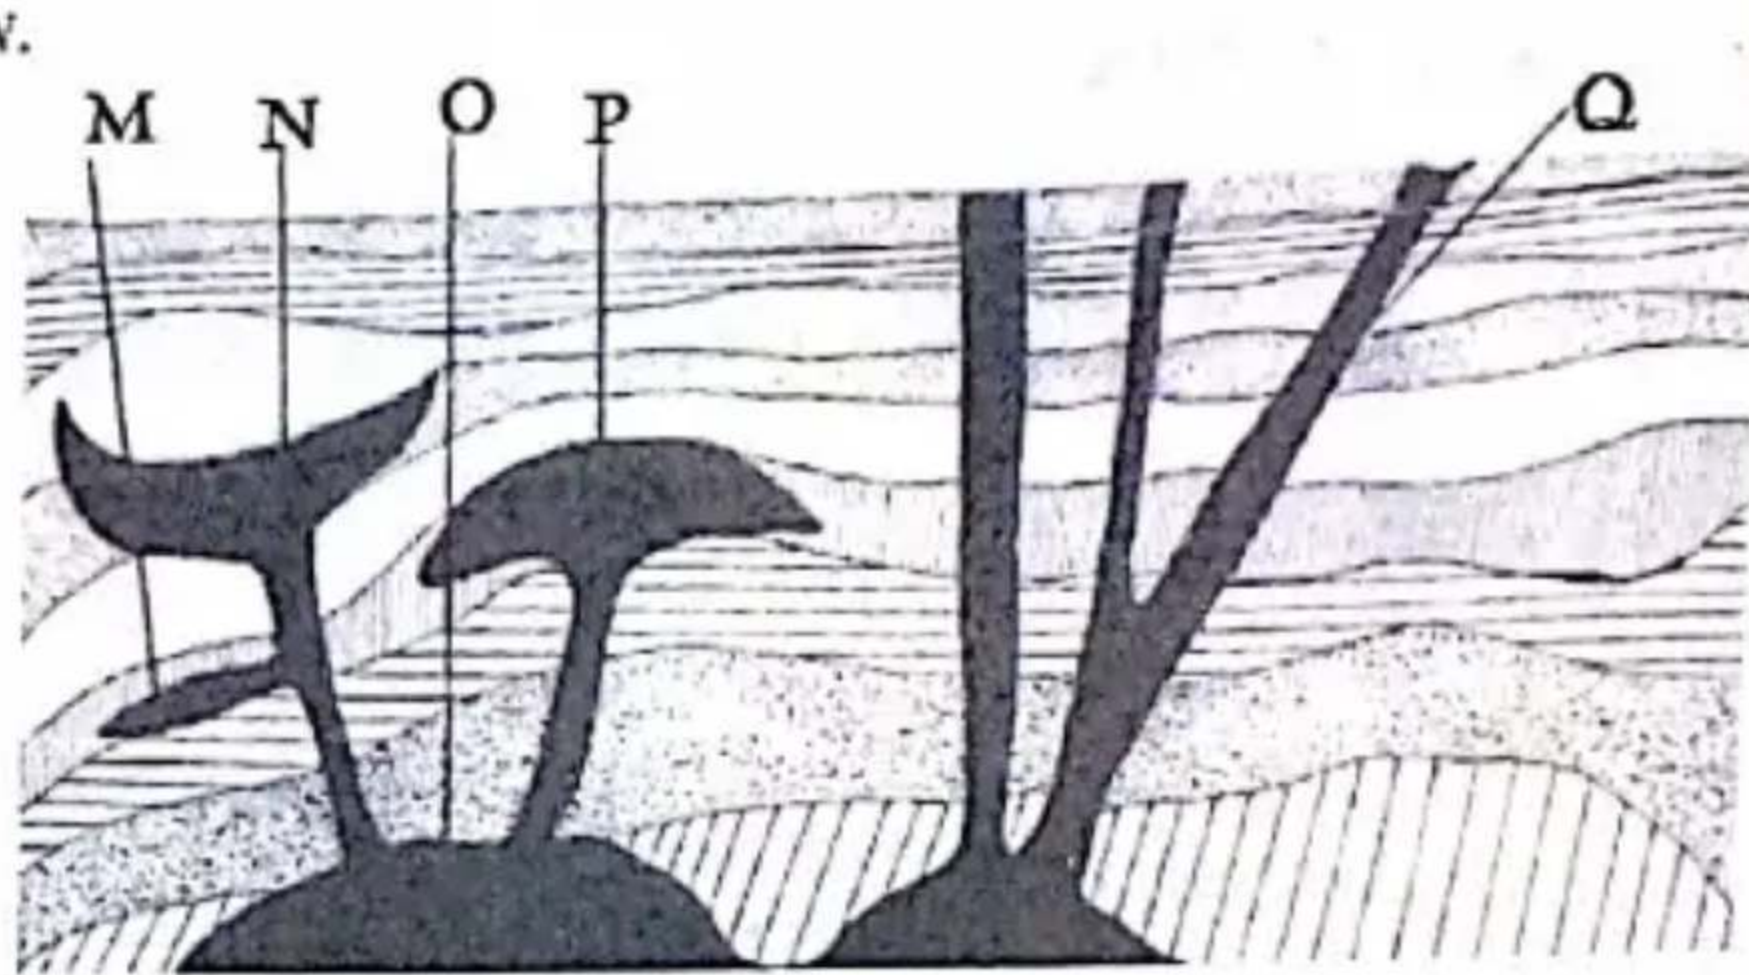

Fig. 1.1

- (i) Name the landforms labelled M, N, O, P and Q. [5]
- (ii) Describe the formation of landforms M, N and Q. [6]
- (c) Outline the precautions to be taken by people who have been warned of an impending earthquake. [7]
- 2 (a) (i) Describe the factors influencing the location of hot deserts. [4]
- (ii) Give reasons why the Southwestern parts of Zimbabwe are generally drier than the rest of the country. [3]

(b)

Study Fig. 2.1 showing the position of the Inter-tropical Convergence Zone (ITCZ) over Africa in January and July and answer questions which follow.

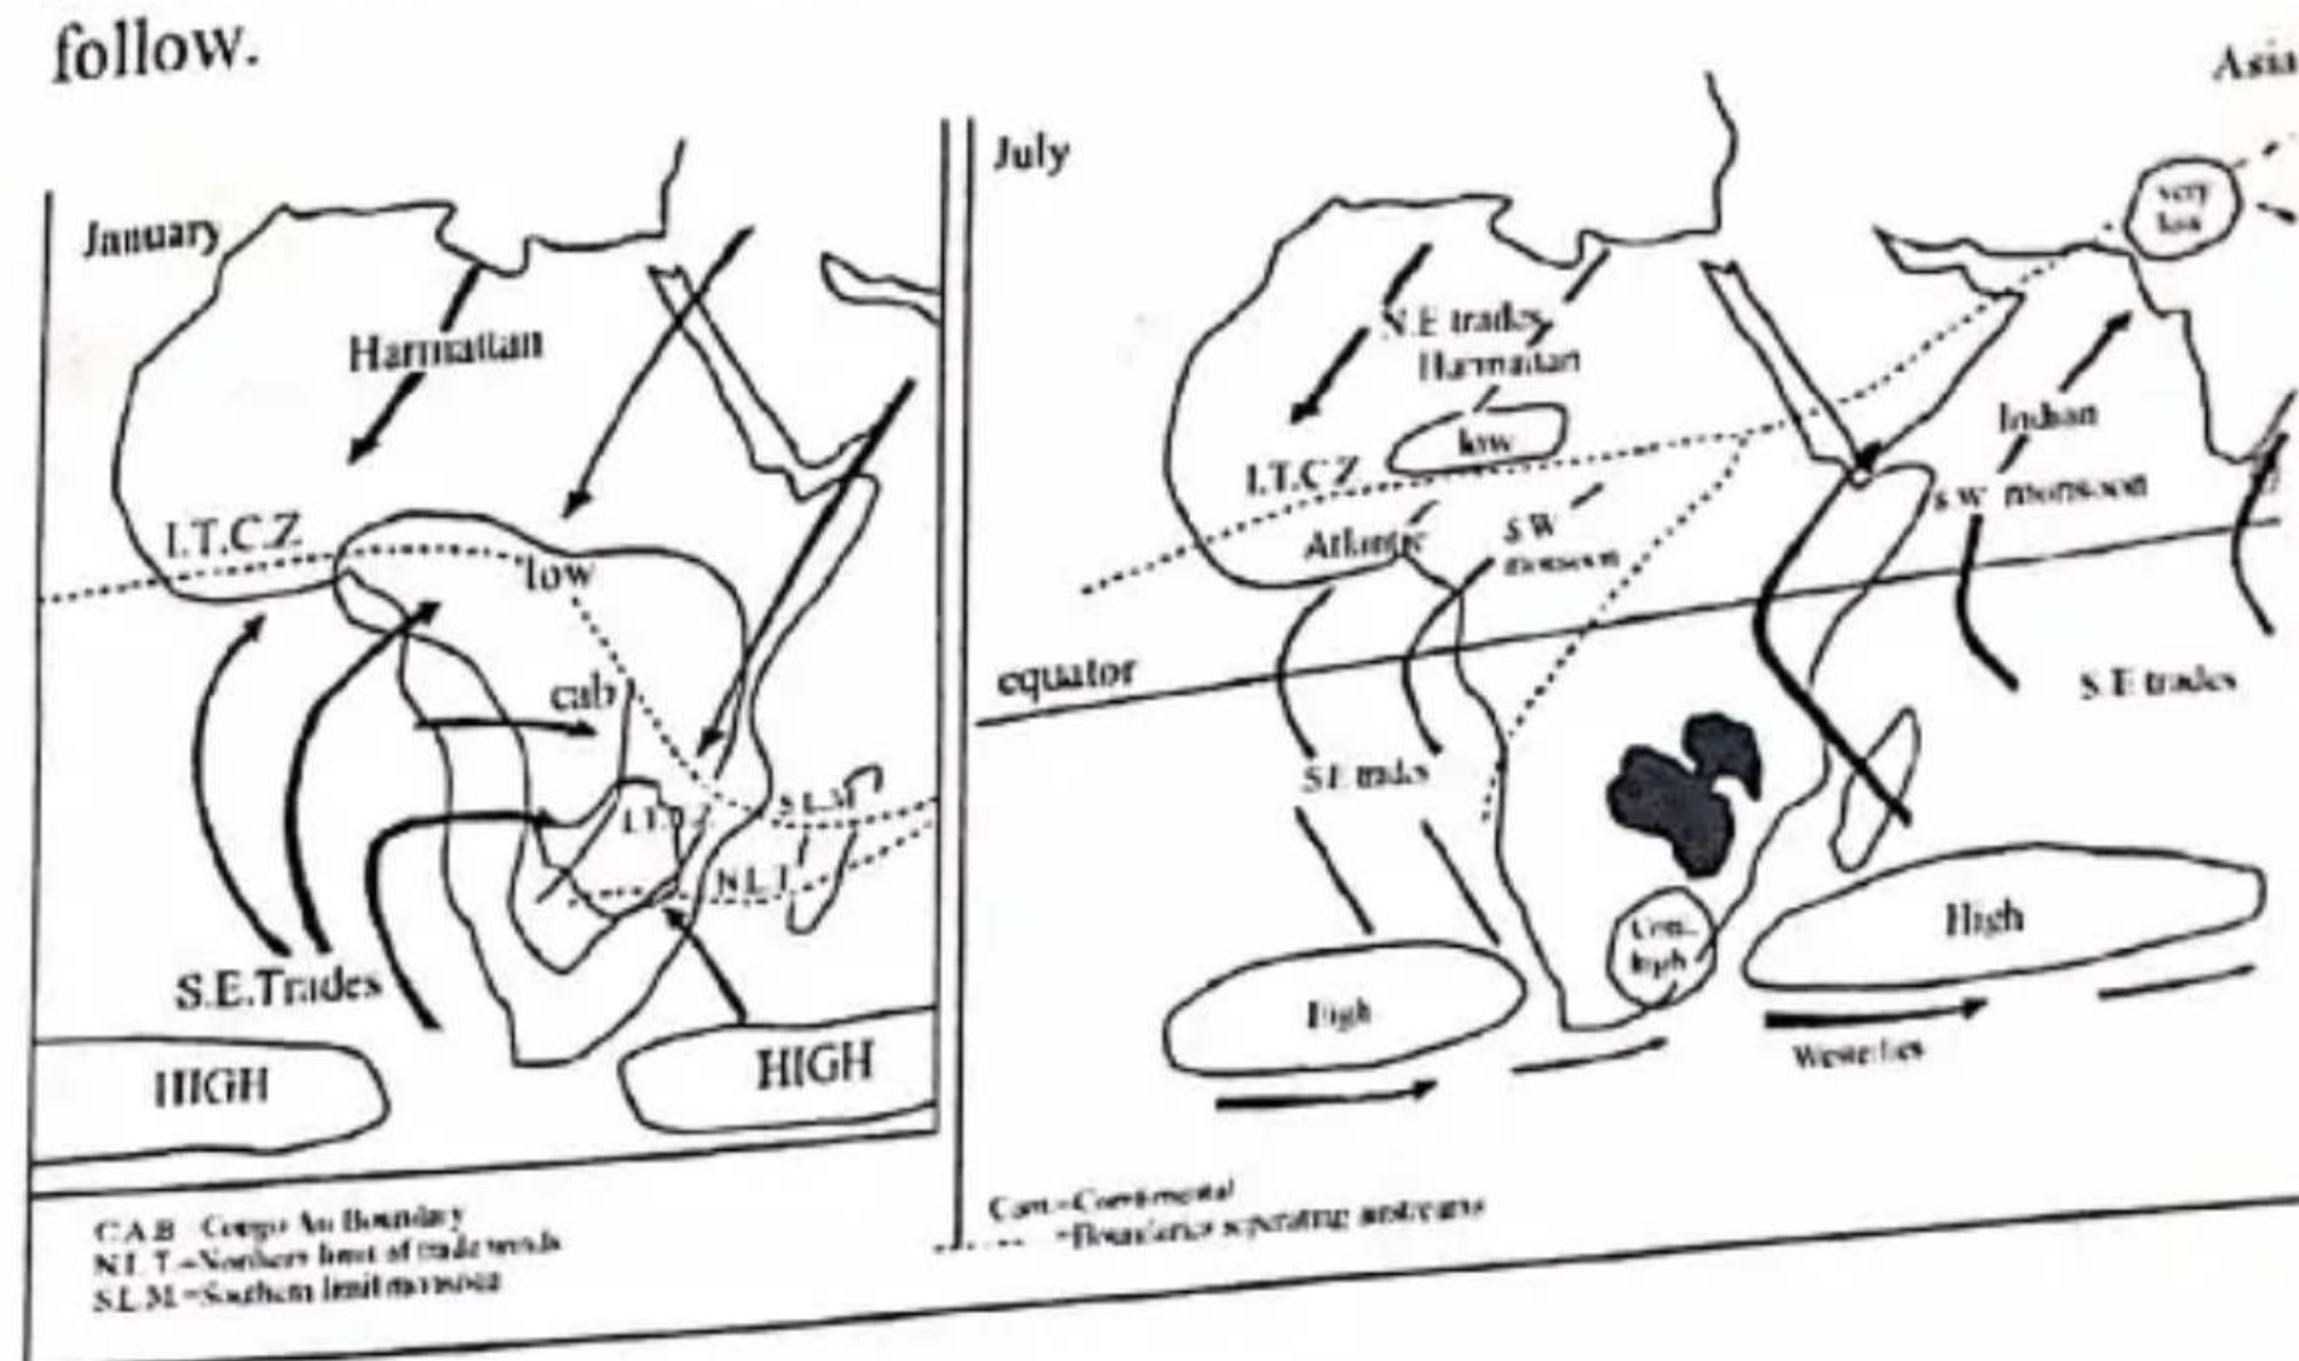

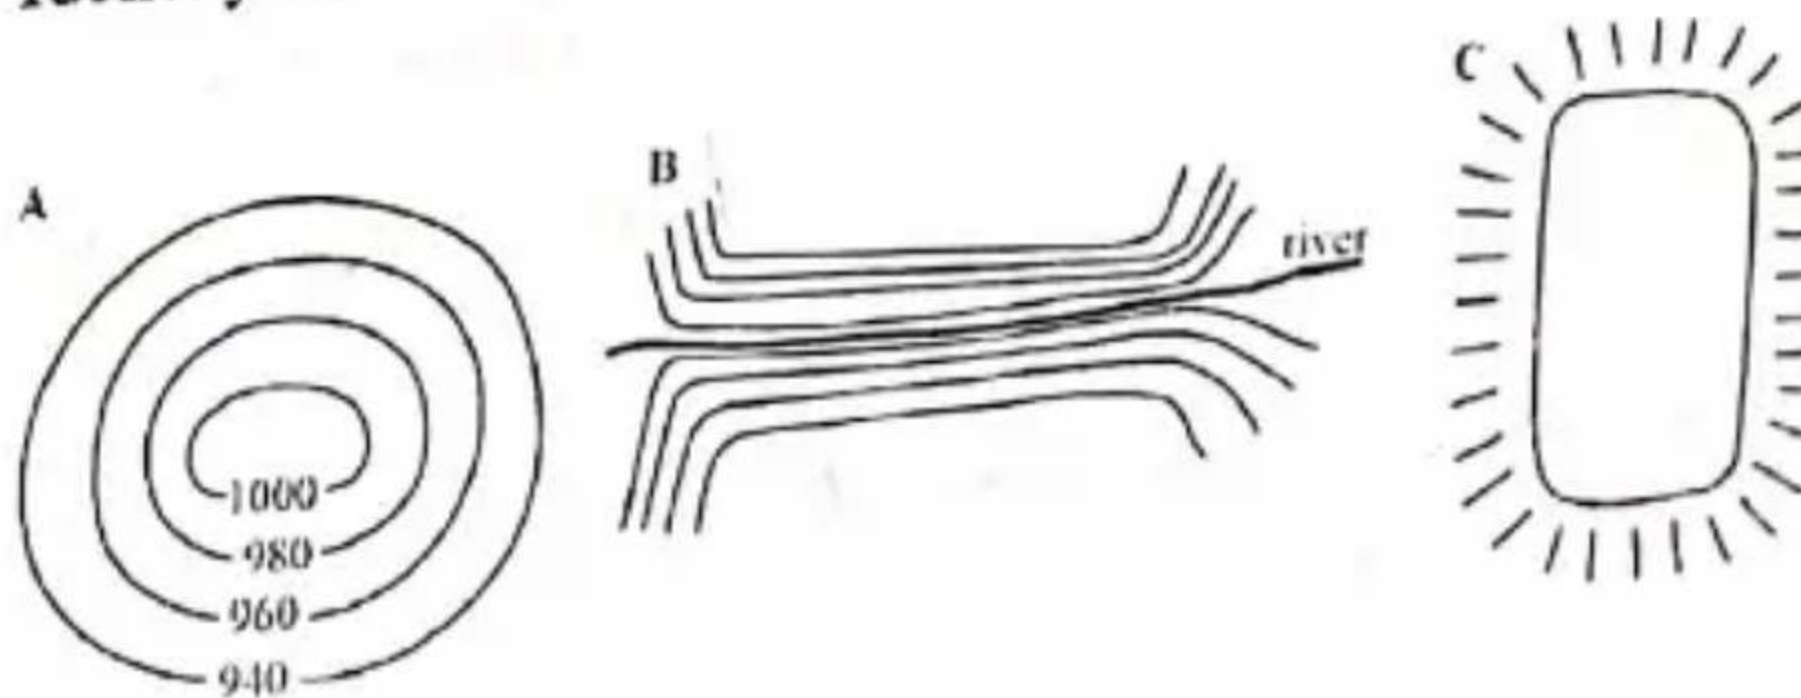

Fig. 2.1

- (i) Explain the wind and pressure systems shown. [8]
- (ii) Name the winds which bring rain to Zimbabwe as shown in Fig 2.1. [3]
- (c) Explain how droughts have affected the economy of Zimbabwe. [7]
- (a) (i) Identify landforms A, B and C below.

[3]

- (ii) Study Fig 3.1 below which shows the process of acquiring/collecting information through remote sensing and answer the questions which follow.

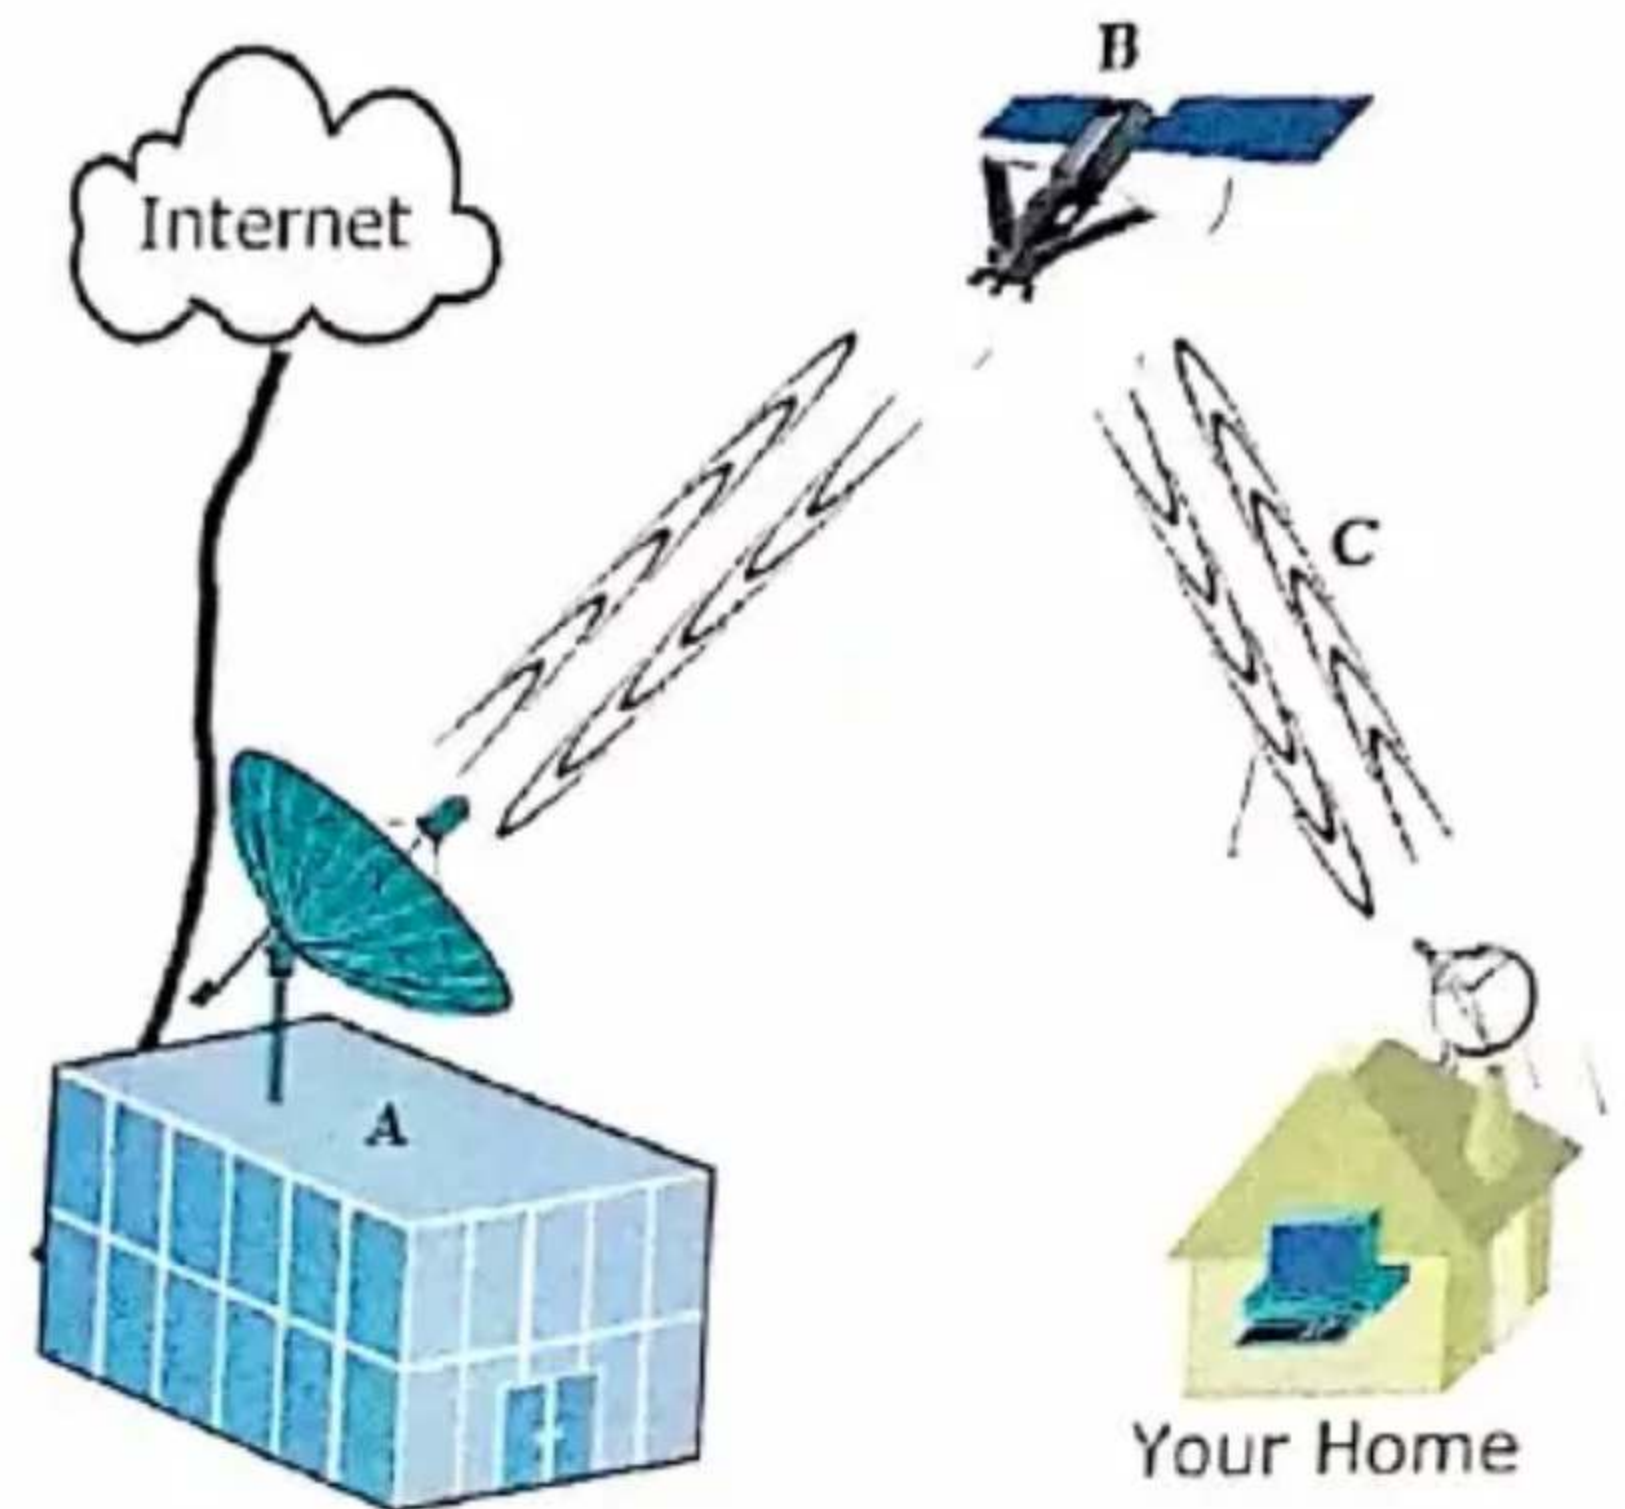

Fig 3.1

Label A, B and C.

[3]

- (iii) Describe the process shown on the diagram above. [3]
- (b) (i) What is the importance of GIS application in the management of earthquakes? [3]
- (c) (i) Draw a labelled sketch map of your school and the surrounding areas. [7]
- (d) Given that :

P denotes a forested area and

Q denotes a step area.

Describe the areas denoted by the following Boolean algebra.

- (i) $P \text{ AND } Q$
 (ii) $P \text{ OR } Q$
 (iii) $P \text{ XOR } Q$

4 (a) (i) State any **three** freshwater ecosystems. [3]

(ii) Outline the components of an aquatic ecosystem. [4]

(b) The photograph below shows a lake weed.

(i) Name the weed shown and any one lake where it has intensively invaded in Zimbabwe. [2]

(ii) Describe the effects of the weed shown. [7]

(iii) Explain the measures that local communities are taking to control the weed. [2]

(c) (i) Suggest factors contributing to the near extinction of rhinoceros as endangered animals in Zimbabwe. [4]

(ii) Explain its chances of survival taking into consideration species diversity. [3]

Section B (Economic Geography)

Answer at least one question from this section

- 5 (a) (i) Explain the meaning of *biodiversity*.
- (ii) Describe human activities that are a major threat to wildlife biodiversity.
- 6 (b) Study Fig 5.1 which shows Zimbabwe's hydrological zones and answer questions which follow.

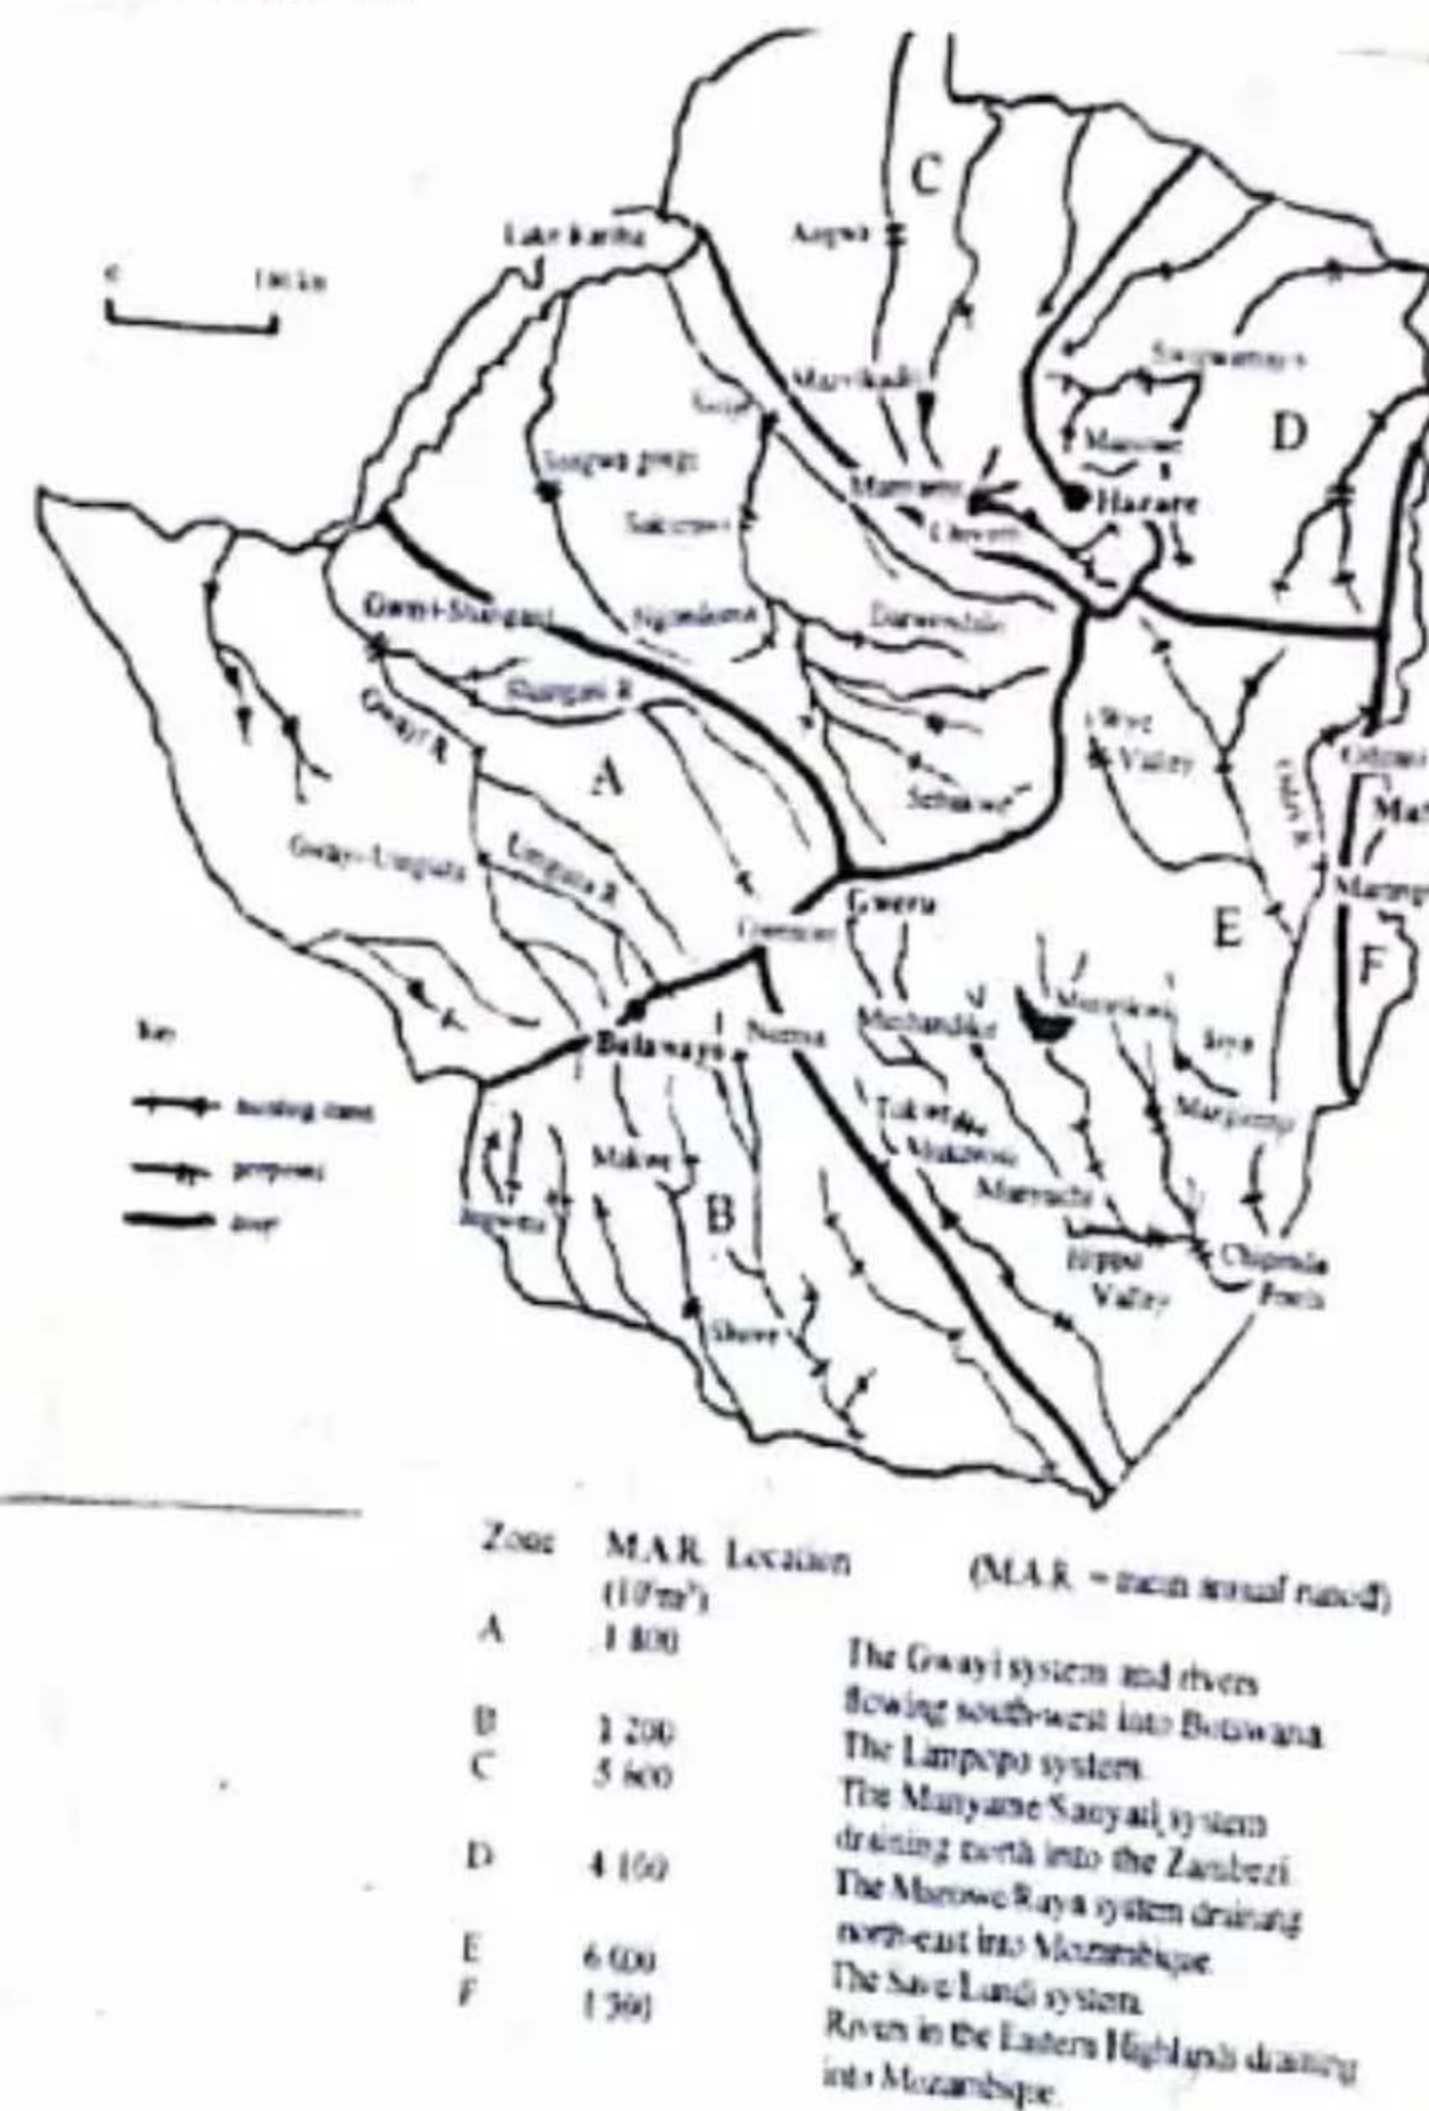

Fig 5.1

- (i) Explain the distribution of existing dams. [5]
- (ii) State the sources of water for Harare, Kwekwe, Bulawayo and Mutare. [4]
- (iii) Identify the hydrological zone which has the largest volume of water. [1]
- (iv) Identify the region with the highest number of proposed dams. [1]

- (c) (i) Propose how people can benefit from occasional floods in an area. [4] ✓
 (ii) Suggest measures to reduce the risks caused by flooding in such areas. [3]
- 6 (a) Outline the advantages and disadvantages of using legislation in the exploitation of minerals. [7]
- (b) Study Fig. 6.1 representing factors and effects of mineral exploitation in Zimbabwe and answer questions which follow.

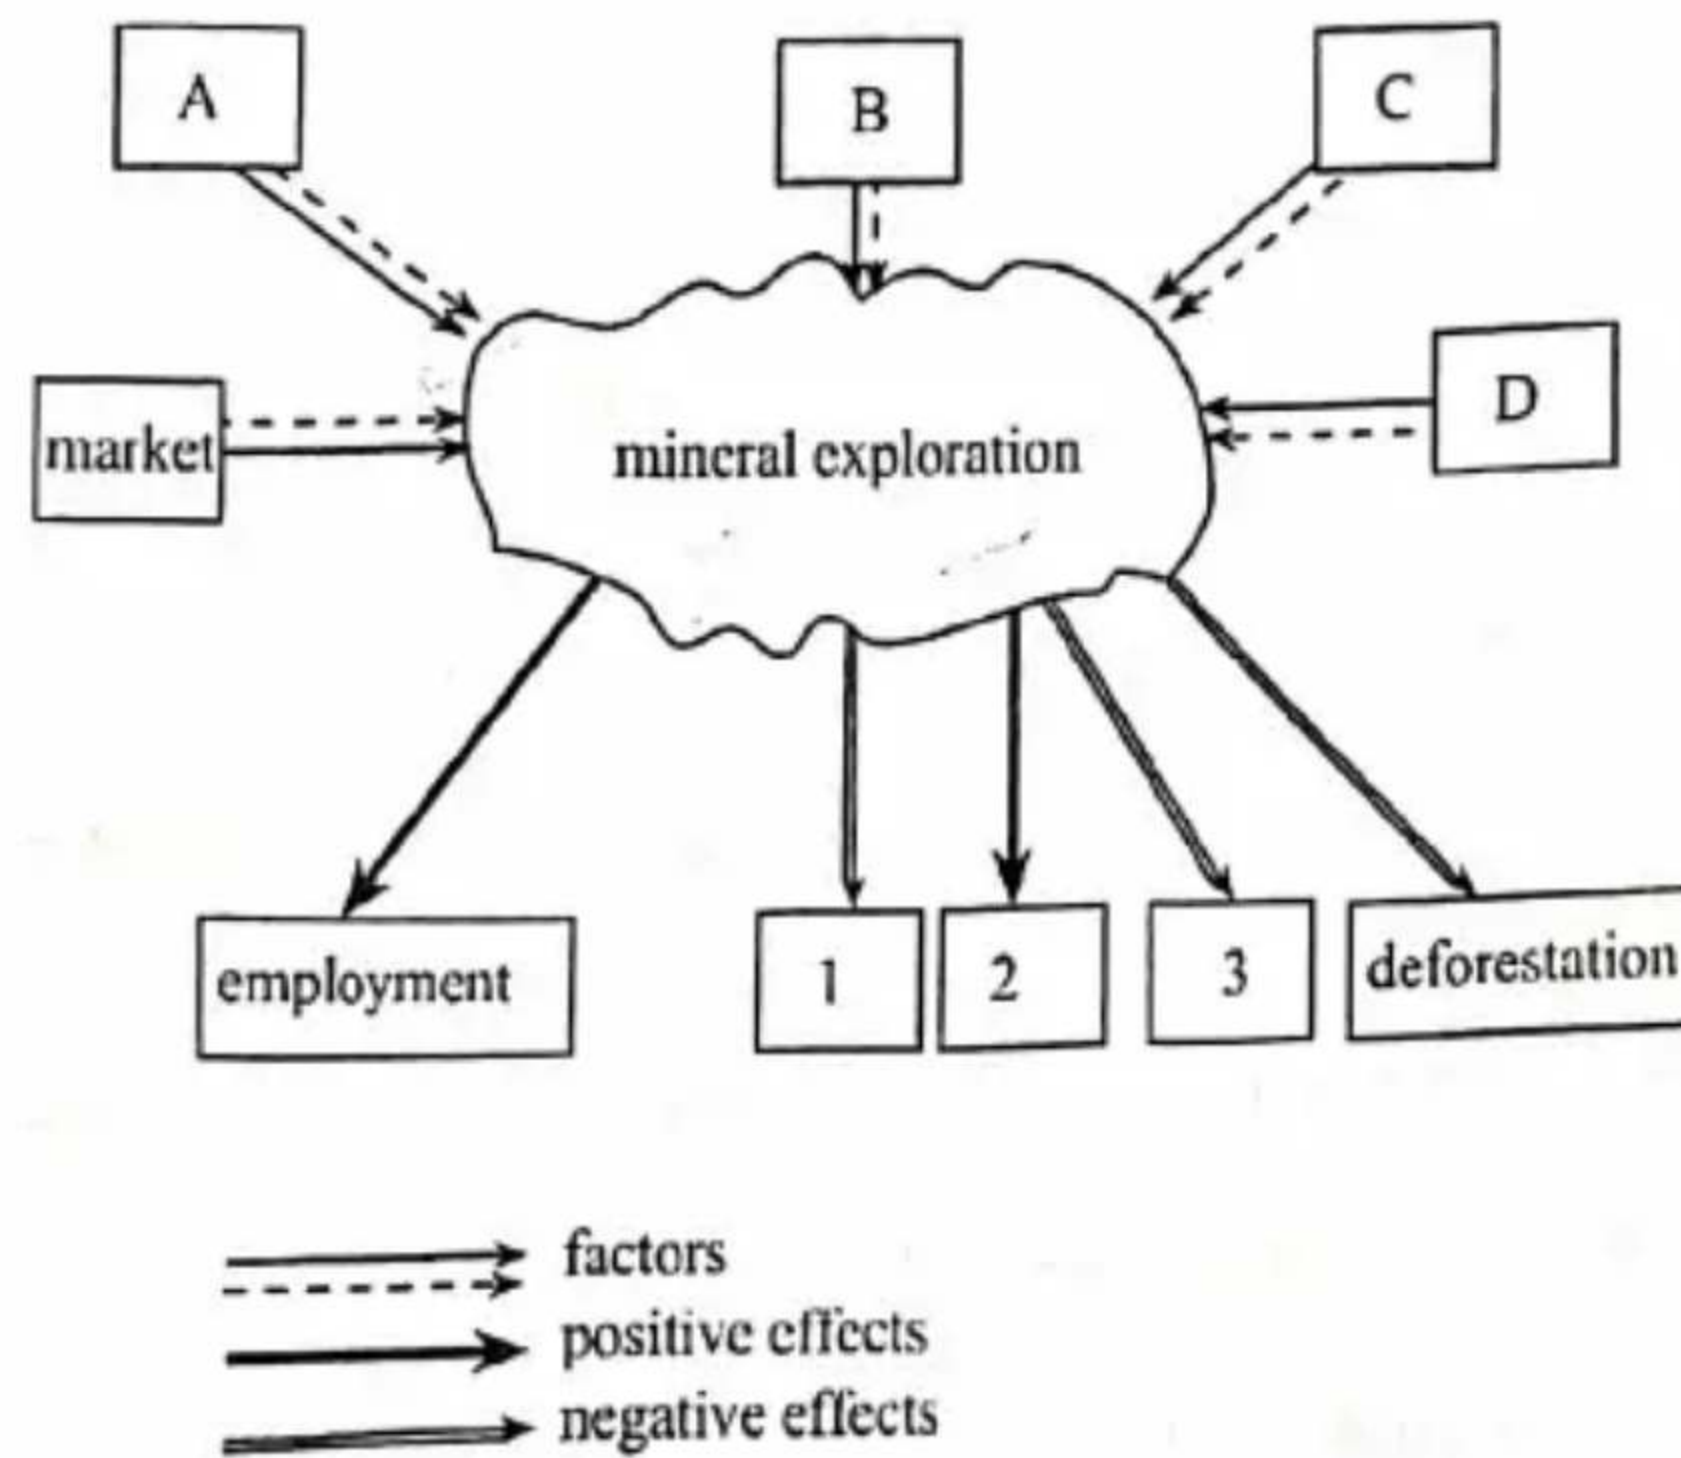

Fig. 6.1

State the factors marked A, B, C and D and the effects marked 1, 2 and 3. [7]

- (c) Study Fig. 6.2 below and answer the questions which follow.

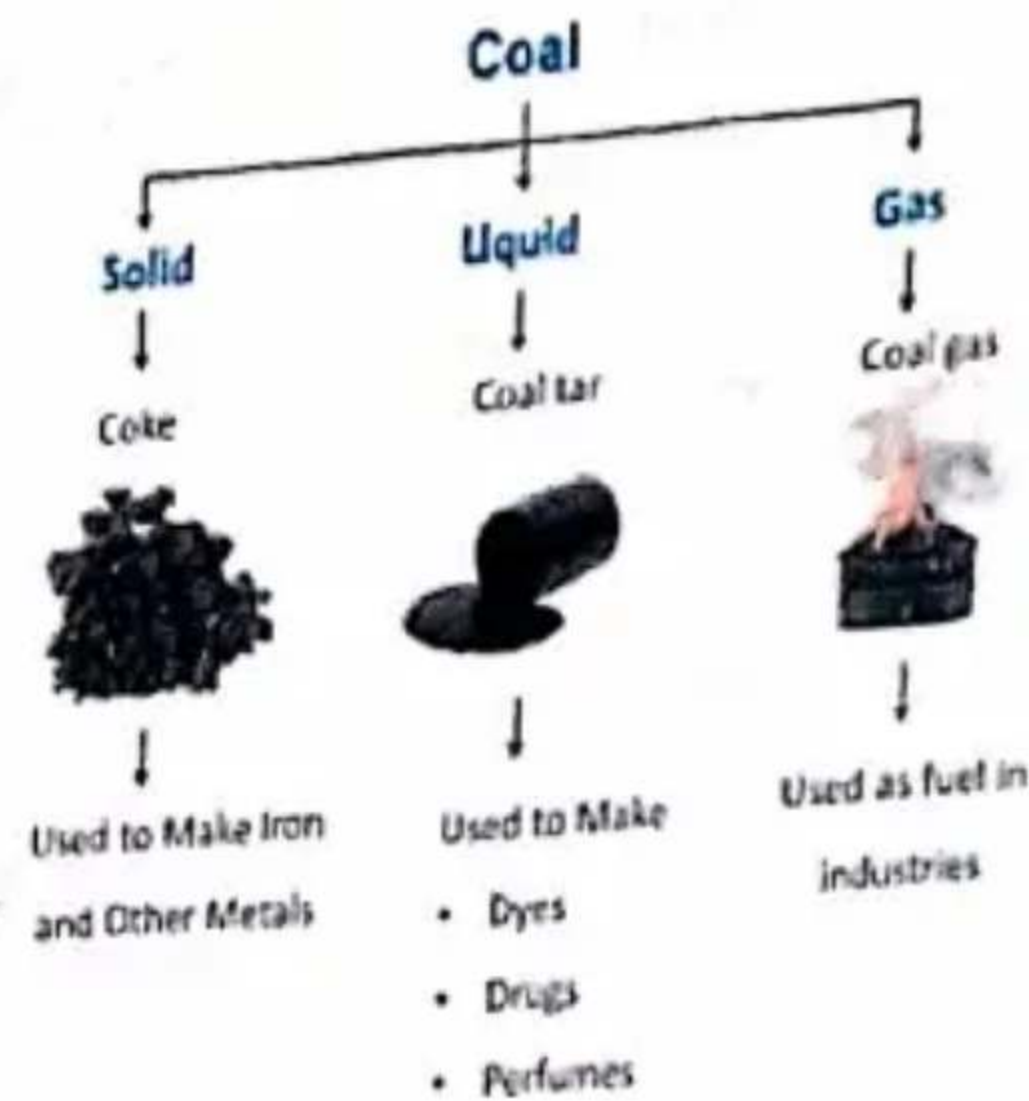

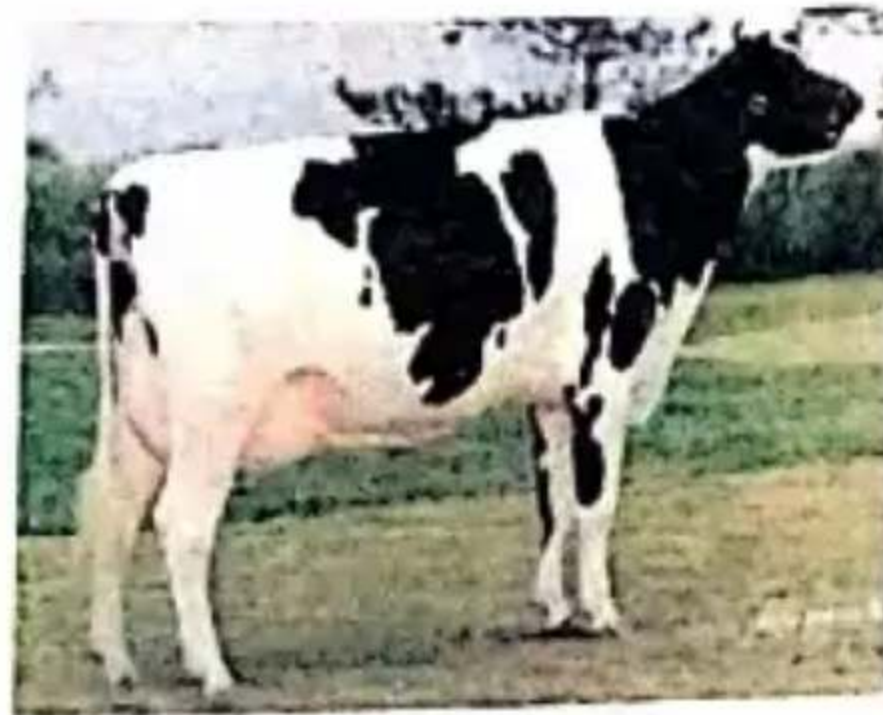

Fig. 6.2

- 621
- Identify the uses of coal shown. [4]
- (d) Suggest the measures you would use for the sustainable exploitation of minerals in your area. [7]
- 7 (a) (i) Outline the objectives of the resettlement programme in Zimbabwe. [4]
- (ii) Describe Model A1 of the Accelerated resettlement Programme. [3]
- (b) Study Table 7.1 below showing outputs of a newly resettled farmer in region IV and answer questions which follow.

OUTPUTS	QUANTITY
Maize	1 tonne
Sorghum	300 kg
Rapoko	250 kg
Groundnuts and roundnuts	400 kg
Sweet potatoes	200 kg
Sunflower	400 kg
Others (Vegetables, beans, cowpeas)	20 kg
Cattle	6 head
Others (Donkeys, goats)	12

- (i) Explain the output of the farm. [5]
- (ii) Draw a bar graph to show the food crops. [6]

- (c) (i) Suggest the social and economic importance of the animals to the farmer. [4]
- (ii) How would you assist the farmer to increase production on the farm? [3]
- 8 (a) (i) State the **four** types of industry. [4]
- (ii) Describe any **three** of the types of industry. [3]
- (b) Study Photograph 8A below and answer questions which follow.

- (i) Name the type of industry represented by the livestock shown. [1]
- (ii) 1. State the inputs of the industry and [5]
2. Outline raw materials obtained from it. [5]
- [10]
- (c) Suggest ways for promoting domestic tourism. [7]

Section C (Population, Settlement, Environmental Management, Transport and Trade)

Answer at least one question from this section

- 9 (a) List the types of energy used in Zimbabwe and their sources. [7]
- (b) Fig. 9.1 below illustrates how thermal power is generated.

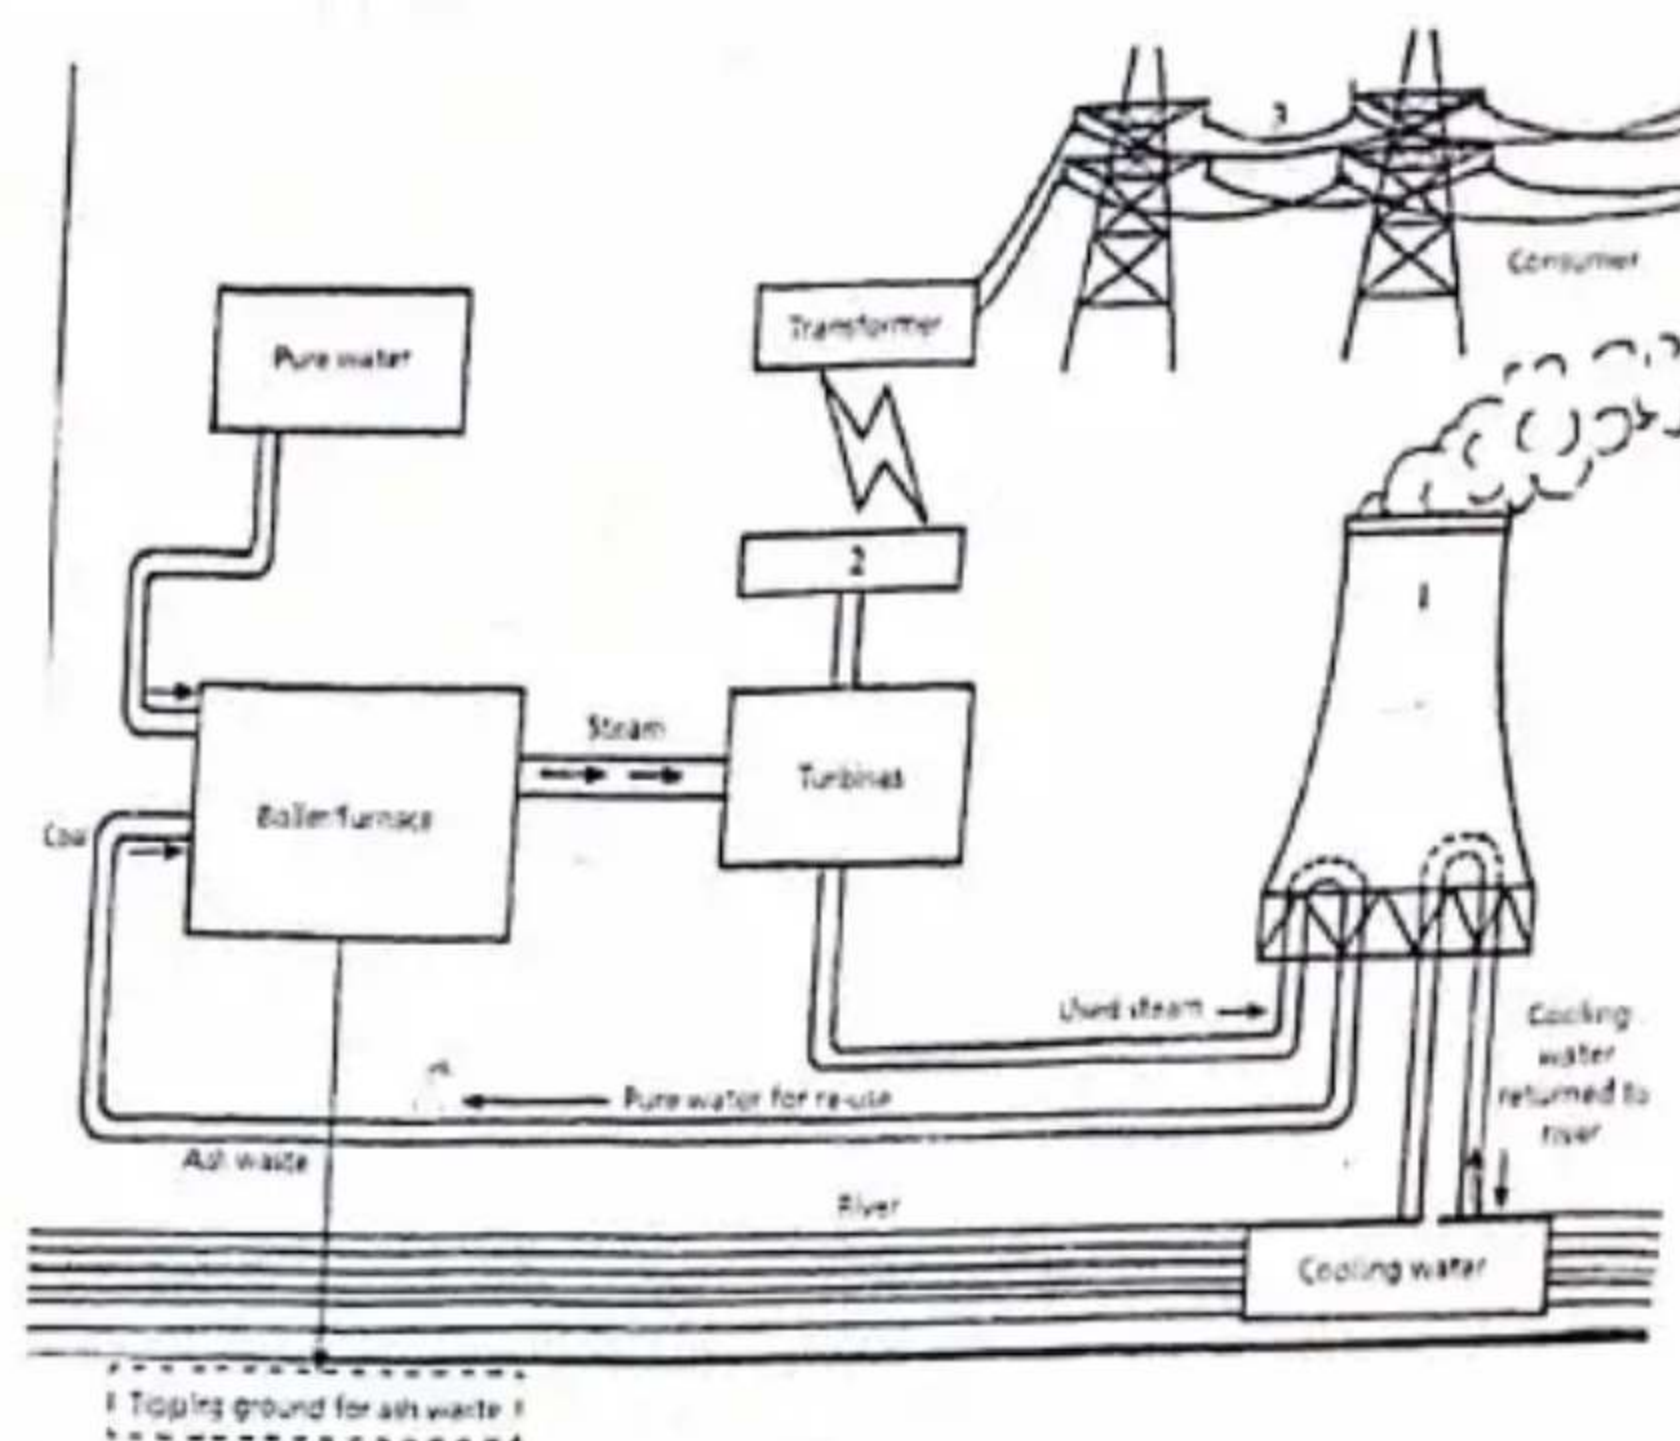

Fig. 9.1

- (i) Name the features marked 1, 2, and 3. [3]
- (ii) Explain how features marked 2 and 3 are used. [3]
- (iii) Identify the inputs for the boiler/ furnace. [2]
- (iv) With reference to Fig. 9.1 above describe how power is generated. [4]
- (c) (i) Suggest the effects of the use of thermal power on the environment. [3]
- (ii) How would you reduce the effects stated in (c) (i) above? [3]

- 10 (a) Define *Chlorofluoro carbons*. *are replaced with those of chlorine & fluorine*
any of a class of organic compounds in which the hydrogen
 (b) Study Fig.10.1 below and answer the questions which follow. [5]

Fig.10.1

- (i) Using map evidence, state the problem that has affected the river. [2] ✓
 (ii) Outline the possible human activities that have caused the problem you identified in b(i) above. [6] .
 (iii) Explain how the human activities stated above have affected the aquatic environment. [5]
 (c) (i) Suggest health problems arising from settling near rivers. [3] ✓
 (ii) Propose the measures that can be taken to reduce the problems. [4] ✓

- 11** (a) State the information that is relevant for a census at your school.
- (b) Study **Fig. 11.1** showing rural settlement patterns and answer questions which follow.

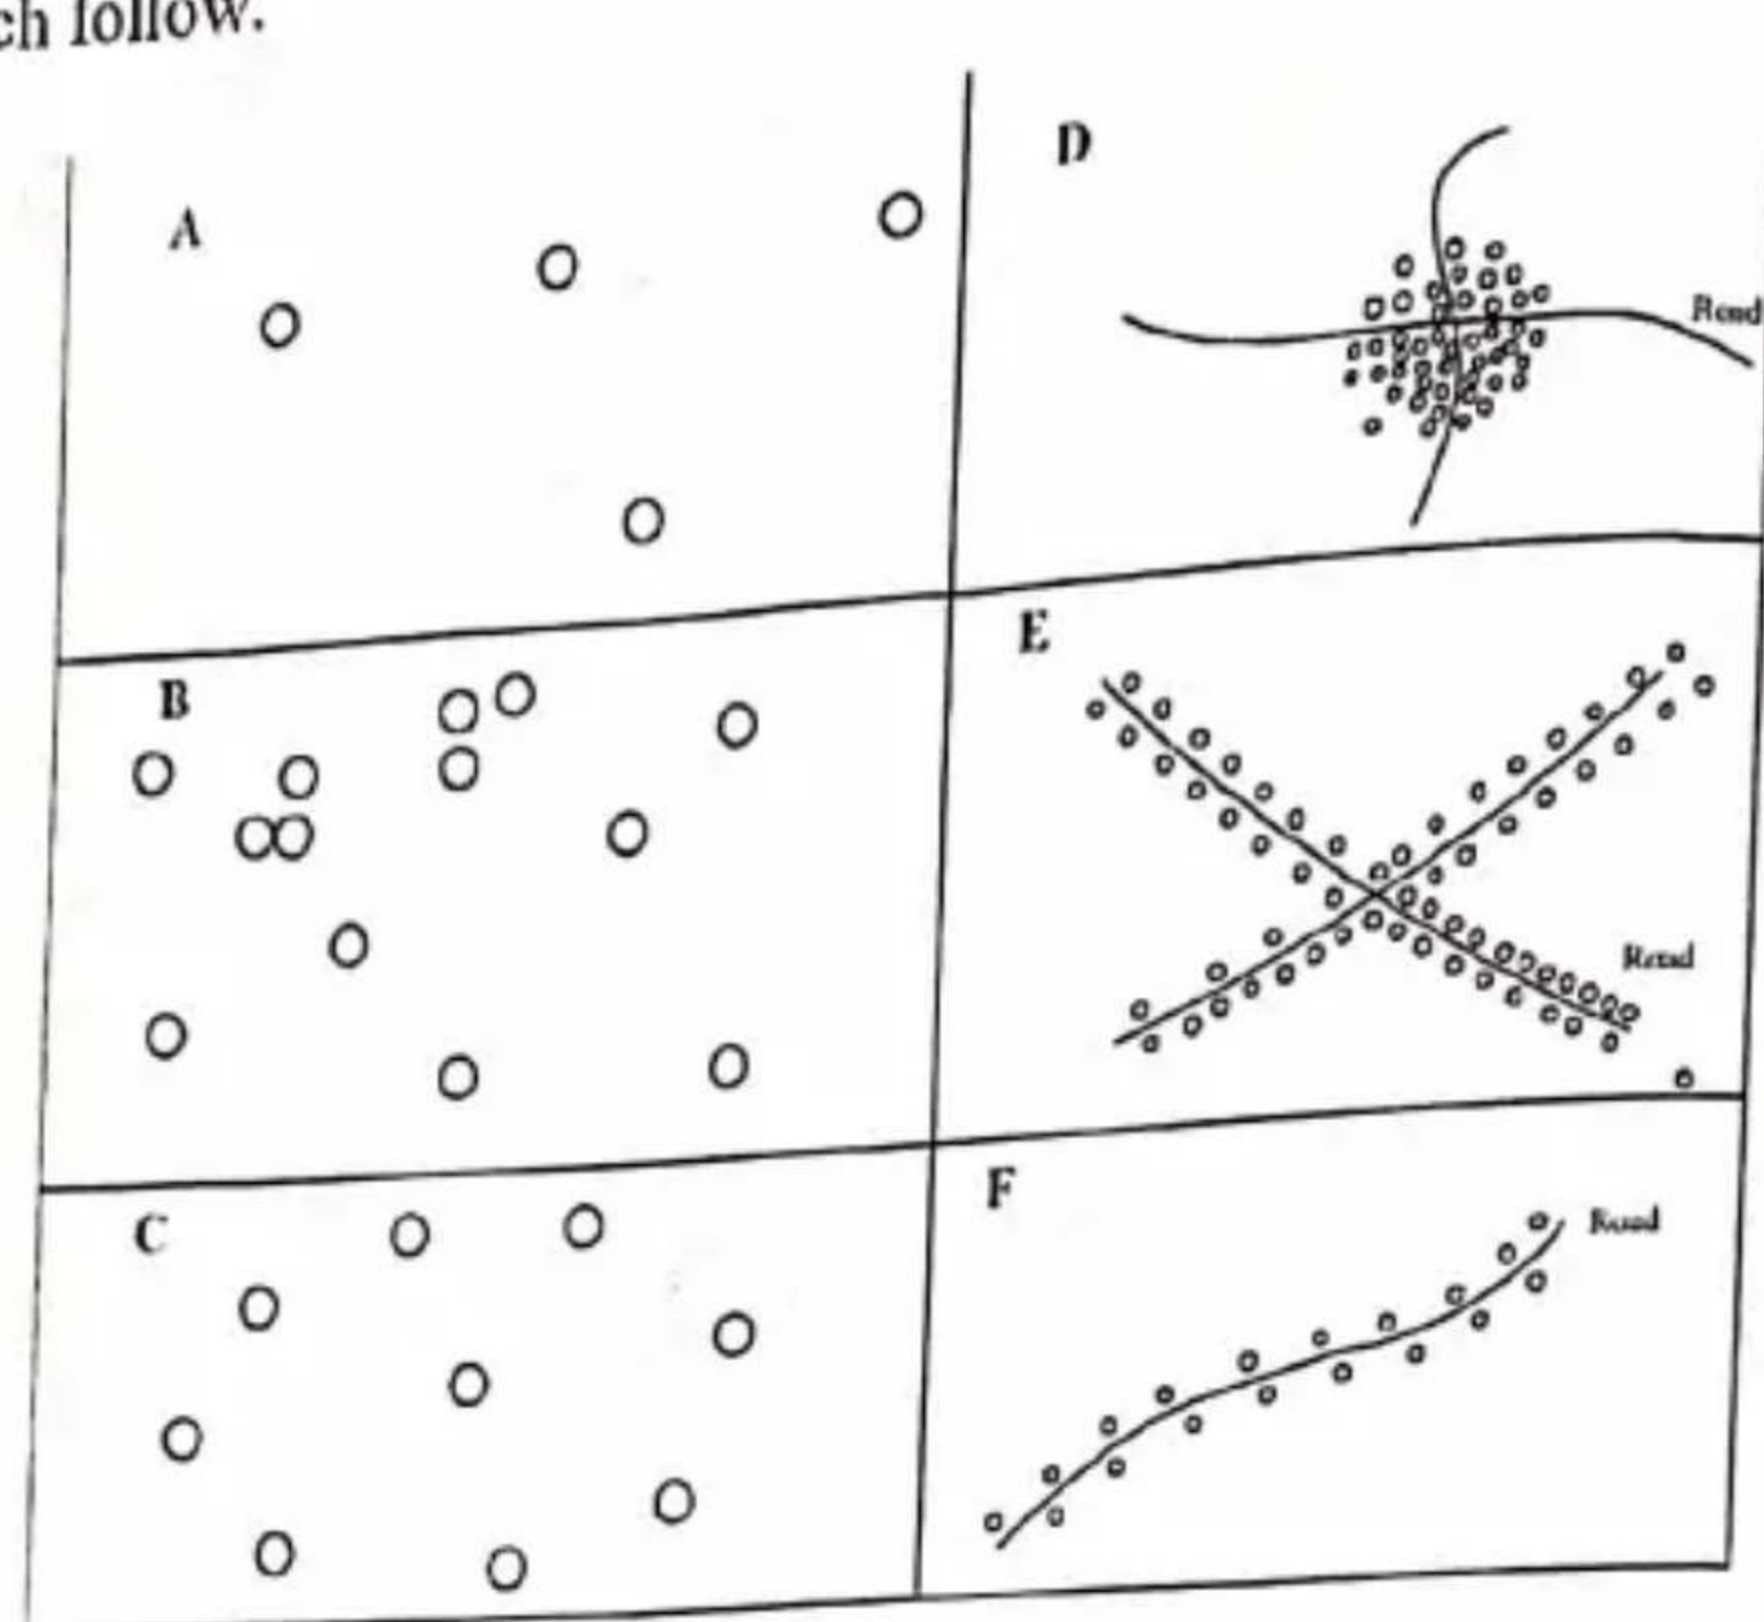

Fig. 11.1

- (i) Name the rural settlement patterns labelled A to F. [6]
- (ii) Describe the characteristics of any **two** settlement patterns. [5]
- (c) (i) Suggest reasons for the moving of some CBD functions to other zones. [4]
- (ii) How do the receiving areas benefit from such movements? [3]
- 12** (a) (i) Explain the term *balance of trade*. [2]
- (ii) Outline the improvements in loading and offloading techniques. [5]

- (b) Study Photograph 12A below and answer the questions which follow.

- (i) Name the mode of transport. [1]
- (ii) Describe the scene in the photograph. [2]
- (c) Fig. 12.1 shows the distribution of Export Processing Zones (EPZ) and potential EPZ sites.

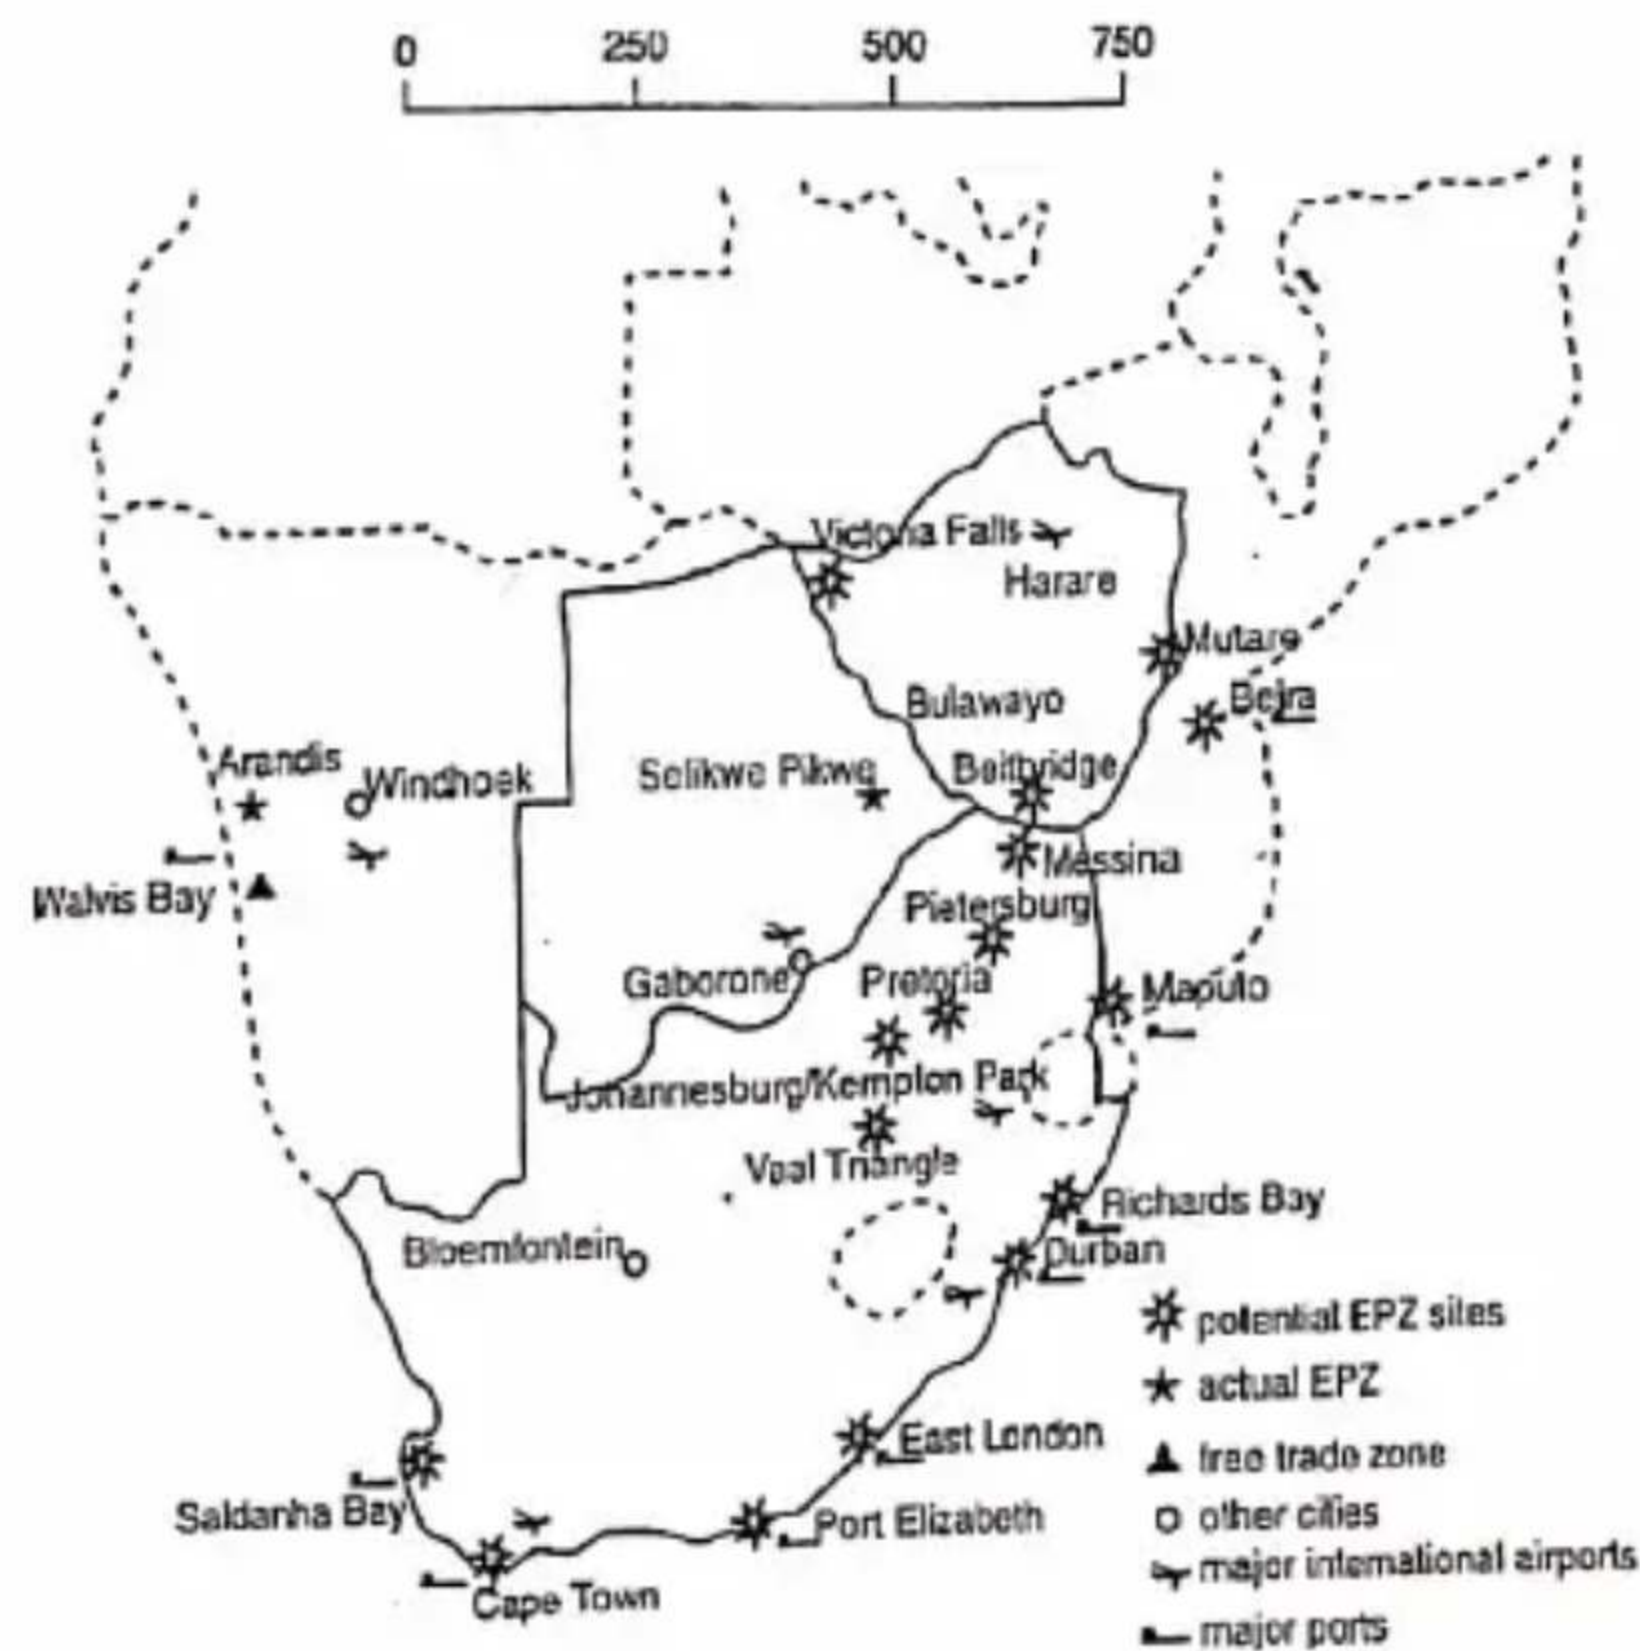

Fig. 12.1

- (i) Explain the location of potential EPZ sites. [6]

- (ii) Name countries with actual EPZ shown. [2]
- (d) Suggest the benefits of cross-boarder trade to Zimbabwe. [7]
